CONTROLMASTER™

INTENSIVE USE SEATING

Performance and ergonomics are key design considerations for this type of chair. Intensive use environments demand that the chairs are able to withstand constant use while providing the support that is expected of a modern ergonomic chair.

Dal Brands experience with ergonomics and seating is evident with the full level of adjustments that **ControlMaster™** offers. Every part of this chair is built and tested for purpose.

Sedentary work is widely recognised as a health risk, so **ControlMaster™** has been designed to promote active working. The responsive forward knee tilt mechanism is positioned to allow reclining without your feet leaving the floor. The generous sized seat is designed to allow you to adopt different postures without restriction from large side bolsters.

Our 6 star aluminium base provides additional strength and stability, particularly when fully reclined.

Our standard fabric is from Gabriel, Fighter fabric is a heavy duty commercial fabric with outstanding wear characteristics.

We hope you'll enjoy the ergonomic benefits of the ControlMaster™ chair.
